About Speed4Trade – Smart digital commerce and service platforms

Speed4Trade supports companies in digitalising and automating their trading and service processes. The software provider specialises in setting up digital sales and service platforms and integrating them into existing IT systems. Since 2005, Speed4Trade has stood for first-class software products, high-performance interfaces and excellent project know-how. The experienced software architects accompany their customers in all project phases – from the initial idea to successful implementation. More than 250 manufacturers and retailers from 19 countries, B2B as well as B2C, gain access to more customers and sales securely, reliably and efficiently thanks to Speed4Trade. This is, what 100 employees at the company headquarters in Altenstadt a. d. Waldnaab in Bavaria are working for every day.
